SKILLS

Languages

javascript | typescript | python | java |
html5 | css3

Frameworks

flask | django | wagtail cms | angular |
express.js | spring boot

Frontend

react.js | redux | sass | less | webpack |
jquery | bootstrap | css-in-js |
styled-components

Other

linux | git | docker | pytest

Backend

restful architecture | sql (mysql, sqlite) |
postgresql | gis | mongodb | node.js |
aws

WORK EXPERIENCE

Lead Full Stack Developer at Stackend Solutions **November 2018- Current**

📍 (USA) <http://www.stackendsolutions.com/>

As lead full Full Stack Developer, I contribute to a variety of projects wherever I am needed. In this role, I also recommended and implemment improvements to the overall web stack used as well as maintain the GitLab repositories. Technologies included: Python, Flask, MongoDB, JavaScript, React, Redux, Sass, Styled-components, Docker, Traefik, GitLab

- Git management and collaboration
- Gained experience with a modern web stack and deployment environment

Freelance Developer at CSO College Center **May 2018- October 2018**

📍 (USA) <http://www.edupages.com/>

Was hired to complete a college directory site using a massive database of college statistics setup by a previous developer. Most of my time was spent building the backend in Django for the college search, www.edupages.com/search, along with all the url patterns for popular majors, cities, and states (www.edupages.com/schools/washington). I used Wagtail CMS to create a hybrid page model for popular major's to be added one at a time by the client and include all the routing for city/state urls (www.edupages.com/accounting/washington).

- Gained solid Django and Postgres database experience

EDUCATION

Bootcamp Web Development at Coding Dojo

2017 - 2017

Major courses: python - django | javascript - mean stack | java - spring

Completed an intensive 12 week fulltime web development program. including the introduction, implementation, and iteration of various web projects over 3 full stacks.

Computer Science at Western Illinois University

2008 - 2010

Studied computer science for 2 years.

PROJECTS

Wagtail React Project

<https://github.com/mazurbeam/wagtail-react-project>

Skills acquired: python | javascript | django | wagtail | react.js | redux

This is what I'm using for my personal site www.mazurbeam.com. The frontend is built with React and the backend is Django-based Wagtail CMS. The pages and menu are added dynamically and editable through the admin dashboard with a redux store handling them on the frontend.
